You imagine it.

We help you realize it.

Your success starts with seeing unique solutions. Even if orbital fish or fruit-based fowl is what you see, you better hope your lithographer can see it, too. So that's our promise to you—if you want your shrimp to sing and dance, we're here to turn up the music.

The creative process shouldn't end at your printer's front door. We built SemaSys Litho Division to extend service far beyond putting ink to paper. "Imagination collaboration" gives you an active partner (that would be us) to help breathe life into your distinctive vision. You never approach two projects the same way—why should your lithographer?

Because, after all, sometimes *chickens just gotta swim, and fish gotta fly.*
